### For Raw-Material supplier:

The delivery of the raw material must comply with the agreed technical and necessary chemical standards and be carried out with the acceptance test certificate according to EN 10204 3.1.

Raw materials that are declared dangerous goods must be labeled according to official and legal regulations! Corresponding technical and safety data sheets must be provided and presented.

### For Equipment supplier:

The functional responsibility of the system is the responsibility of the manufacturer and will not be transferred to NIFCO Germany GmbH through design discussions, retraction of the system or similar.

We refer to the provided specifications, records and technical notes.

The equipment manufacturer warrants that the equipment complies with all recognized and relevant legal regulations and requirements in USA, in particular the valid EC Machinery Directive, the DIN standards applicable to the equipment and the USA accident prevention and health and safety regulations. The systems are delivered with the corresponding declarations of conformity. The manufacturer further assures that all assemblies meet the requirements of the electromagnetic compatibility test. Changes, delays or other delays that can be detected in good time are to be reported immediately to the responsible project manager.

### For Service Provider:

We refer to the agreed requirements, specifications, records and polls and your offer xxxx from xxxxxx. See attachments for ordering.

The service provider will be provided with the services below. Additional services that are not listed will not be paid!

For appointments in the house NIFCO, the service provider has to provide independently for personal safety equipment in particular safety shoes and safety vest own responsibility or bring along!

### For Tooling suppliers:

We refer to the provided specifications, and records. See attachments for ordering.

The tool manufacturer is solely responsible for compliance with all dimensions and for the required by the article drawing tolerances on the injection molded parts according to provided data record. In particular, the supplier warrants compliance with all technical data and values specified in the tool specification and the component data set made available, as well as all other properties which are essential for NIFCO. Changes, delays or other delays that can be detected in good time are to be reported immediately to the responsible project manager.

For appointments in the house NIFCO appropriate personal safety equipment in particular safety shoes and safety vest is to bring own responsibility!
